

MAGNA-LOCK™

A Magnetic Locator used to find valve box lids, curb valves and manhole covers.

The new Magna-Lock ferromagnetic locator provides top of the line magnetic locating, including our new push-button “erase” feature and power line indicator, providing greater flexibility and enhanced performance.

Erase Feature

When a disturbance, such as a metal fence, is confronted, simply press the “erase” button and it is electronically erased for continued searching without interference. No need to reduce the sensitivity: Magna-Lock always returns to perfect magnetic balance when the “erase” button is pressed.

Power Line Indicator

This feature visually indicates the presence of power lines during a normal magnetic search. Note: This feature is only an aid and not intended for locating buried power lines.

Sensitivity

The sensitivity control adjusts smoothly providing the user with a full range of depth capabilities, equaling or surpassing competitive locators.

Volume

Adjustment of the audio volume for the desired listening levels is achieved by turning the volume control knob from low background levels to full volume.

Features

-  *Push Button ERASE*
-  *Power Line Indicator*
-  *Water Resistant Case*
-  *Long Battery Life*
-  *Easy To Operate*
-  *Lightweight*
-  *Quality Built - 5 Year Warranty*

MAGNA-LOCK™

Specifications

Power:	Six AA 1-1/2 volt batteries
Battery life:	100 hours of intermittent operation (alkaline batteries)
Output:	Powerful magnetic speaker with waterproof Mylar cone.
LCD Display:	Numeric digital, analog Bar-graph and low battery indicator feature.
Weight:	Approximately 3 lbs. (1.3kg) with batteries.
Operating Temperature:	0°F to 120°F (-18°C to 49°C).
Length:	42 inches (106.68 cm).
Construction:	High impact plastic, water resistant, light weight and epoxy painted. Aluminum sensor tube waterproof to just under the plastic case.
Patent:	United States #4,439,732
Nominal Sensor:	20 inches (50.8 cm)

Order:
Part No. 6500001
Includes soft-sided carry case and manual.
